ABOUT US

For over **5 years**, Centrelocus has been at the forefront of technological innovation, supporting enterprises, governments, NGOs, and startups worldwide to meet their objectives for growth, user engagement, subscriptions, and revenue. Our mission is centred on delivering **state-of-the-art** digital services tailored to enhance your business outcomes.

We are committed to excellence in our technical strategies, ensuring significant and visible results for all our clients, regardless of their initial circumstances.

Our developers bring an impressive depth of experience, averaging 10,000 hours of coding each, enabling us to handle complex projects with precision and skill. We offer a collaborative and client-focused approach, allowing for varying levels of engagement to suit your needs. During the development of your web or app, a dedicated project lead will ensure you remain informed and involved at every step. We also provide specialized developer outsourcing services.

"We take great pride in being selected as the official vendor partner for Morgan State University. Leveraging our established track record with prestigious institutions such as Harvard Medical Science and various alumni-led startups, Centrelocus is recognized for delivering first-rate coding and consulting services across a range of IT sectors, guaranteeing exceptional quality."

Amit Gupta
CEO/Founder

STAFF AUGMENTATION

At Centrelocus, we understand the dynamic nature of the technology industry and the constant need for businesses to adapt and evolve. Our staff augmentation services are designed to seamlessly integrate with your existing operations, providing the following benefits:

Global Talent Access:

Leverage our extensive network to access a global pool of top-tier IT professionals. With Centrelocus, you can tap into specialized skills from around the world, ensuring that no project is limited by local talent shortages.

Cost Efficiency:

Enjoy significant cost savings with our flexible staffing solutions. We help you reduce overheads by handling the recruitment, benefits, and other employment costs, enabling a more economical approach to scaling your workforce.

Scalability and Flexibility:

Our services are designed to provide you with the workforce you need when you need it. Whether scaling up for a major project or scaling down post-delivery, Centrelocus offers the flexibility to adjust your team size quickly and efficiently.

Seamless Team Integration:

Our professionals are not just skilled in their technical domains but are also trained to adapt to diverse work cultures, ensuring smooth integration with your existing teams and promoting an environment of mutual learning and collaboration.

WHY CHOOSE US?

FREE 3-DAY TRIAL

Experience our services firsthand without any commitments. We offer a free three-day trial that allows you to evaluate our approach and the quality of our work, ensuring we meet your expectations.

HIGHLY QUALIFIED & VETTED IN-HOUSE ENGINEERS

Our team comprises highly skilled engineers who have been rigorously vetted to ensure they meet our high standards. With expertise across various domains, our in-house professionals are equipped to tackle complex challenges and deliver top-tier solutions.

FULL CONTROL AND ACCOUNTABILITY

When you partner with Centrelocus, you maintain complete control over the project. We believe in transparency and accountability, providing you with regular updates and access to oversee the project.

GUARANTEED RESOURCE QUALITY WITH FREE REPLACEMENT

We are confident in the quality of our resources, but we understand the need for flexibility. Should there be any mismatch or dissatisfaction, we offer free replacement of resources to ensure that your project always has the best fit.
