Amit Gupta
CEO

Company Overview

About Us

An ISO 9001 and 2007 certified, Govt. of India recognised Startup. We proud ourself as being an official vendor partner of Morgan State University, Maryland, USA and having worked with Harvard Medical Science based startup, our portfolio has gone strong year by year. With solid experienced team of subject- matter experts in Blockchain, AI, Web Designing, Games and Mobile app Development, we deliver supremacy.

Mission

Our mission is to empower businesses with innovative digital transformation solutions that drive sustainable growth

Vision

Our vision is to become a globally recognized leader in creating digital transformation solutions, renowned for our creativity, expertise, and unwavering commitment to our clients' success.

Our Founder

Amit Gupta
CEO

Amit Gupta is a dynamic entrepreneur and the CEO of Centrelocus, a leading IT firm renowned for its innovative website and mobile app development services. With a global footprint spanning over 18 countries, Centrelocus has established itself as a trusted partner for prestigious clients, including the British Healthcare Association and the Harvard Medical Science AI project.

Amit's academic background includes a degree in mathematics, an MBA, and certification as a PRINCE2 practitioner from the UK. His entrepreneurial journey is marked by a series of successful ventures. One of his key initiatives is PoolFunders, a platform designed to help startups and indie artists raise capital without giving up equity. This project underscores Amit's dedication to supporting emerging talent and fostering innovation.

He also leads Foliobull, a platform that simplifies the management of crypto and digital assets. Foliobull enables users to manage their portfolios across multiple exchanges, engage in auto trading, and track NFTs. The platform also promotes financial literacy through virtual trading features.

He frequently speaks at blockchain summits and digital transformation events in the USA, Canada, UAE, and the UK. His expertise has also been sought by the blockchain advisory team for the President of Bermuda, and he has served as a ghost panel judge at a UN webinar.

Through his leadership and vision, Amit continues to make a significant impact in the technology and startup ecosystems, always striving to empower the next generation of innovators.

Our Approach

Discovery & Strategy

We begin by we creating an intuitive and visually appealing user experience.

Design & Development

Then our creative team crafts visually stunning and user-friendly websites and applications

Testing and Implementation

Quality assurance testing to ensure the app meets quality standards and user expectations.

Delivery

Deployment of the finalized app to users through app stores or other distribution channels.

Case Studies

Project Overview

Our company was approached by Morgan State University to develop a comprehensive mental health platform designed to empower individuals on their wellness journey. The objective was to create a mobile application and software that would provide users with a suite of tools and resources to promote a balanced lifestyle. Our task was to transform their vision into a robust and user-friendly platform.

Solution

Our team developed a comprehensive solution utilizing React for the front end, Python for backend processing, AWS for hosting and cloud services, and HTML for the web page structure. The platform included mental health assessments to offer valuable insights into users' mental health status, secure journaling to encourage self-expression and emotional healing, and mindfulness exercises such as guided imagery and deep breathing for stress management. We also integrated a crisis support feature, providing immediate access to crisis contacts during times of need.

Challenge

We began by identifying and assessing several key challenges. Ensuring user privacy and security was paramount, as the platform would handle sensitive mental health data.

User Privacy and Security

Ensuring the confidentiality and security of sensitive mental health data.

User Engagement

Keeping users consistently engaged with the platform to maximize the benefits of the tools and resources provided.

Integration with Healthcare Providers

Facilitating seamless communication and data sharing between users and healthcare providers.

Outcome

The implementation of our solution resulted in several positive outcomes. Users reported enhanced well-being and improved mental health due to the comprehensive tools and resources available on the platform. The engaging features, such as secure journaling and mindfulness exercises, led to high user engagement and regular usage. The crisis support feature proved effective, providing immediate assistance to users in need and contributing to better mental health outcomes.

Client Testimonials

Software Development

Empowered Wellness

Dr. Dawn Thurman

Professor at Morgan University
